Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claim 13 is objected to because of the following informalities: In claim 13, lines 3-4 appear to claim the same structure as lines 1-2. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 & 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lykken et al. (6,318,484).

Lykken et al. discloses a track assembly having all of applicant's claimed structure including a top tandem arm 102, a bottom tandem arm 193, an adjustable frame (including members 194 & 196 shown in figure 6) for adjustably spacing front and rear idler wheels 164 & 162, and a belt 144 as shown in figures 3 & 4.

Claims 1 & 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Gignac (6,125,956).

Gignac discloses a track assembly having all of applicant's claimed structure including a wheel frame, a first tandem arm 46 pivotally connected to the wheel frame, a first wheel operably connected to the wheel frame by the first tandem arm, a second

Art Unit: 3671

wheel 60, a continuous ground-engaging belt, a first idler wheel structure as identified in the modified figure below. Gignac further discloses a hitch member 105.

Allowable Subject Matter

Claims 9-11,13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 2 is allowed.

Response to Arguments

Applicant's arguments filed 5/31/05 have been fully considered but they are not persuasive. Applicant argues that neither Lykken nor Gignac correspond to the claims

Art Unit: 3671

as amended. The examiner disagrees and notes that applicant's arguments are more limiting than the claims themselves. For example, in claim 1 applicant does not include structure that would require the middle frame 48 of Lykken to be considered the adjustable fame. Therefore, the prior art is deemed to anticipate the claims as set forth in the rejection above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (571) 272-6987. The examiner can normally be reached on Monday through Thursday.
